SUCCESS WITH THE BASICS

Scott Smith - General Manager

This month, let's remember some of the basics, and how they can help us be successful in the field.

Safety First

The importance of safety cannot be overstated

- Proper PPE (Personal Protective Equipment): Always wear high-visibility vests when appropriate
- Emergency: Always carry a basic first-aid kit
- Vehicle: Keep your vehicle in good working condition

Maximize Efficiency

- Tablet: Make sure your tablet is charged
- Filters: Use your filters to help you route
- GPS/Map: Understand GPS map view and how it can benefit you and put your jobs in order and give you turn-by-turn directions
 - Reschedules: Check your reschedules every day
 - Expiration Dates: Make sure you set your expiration dates on non-pays
 - Non-Pays: Work your newest non-pays asap

Tips for Success

- Reschedule Filter: Use your reschedule filter to help document your work orders
- Attempts: Make sure you are getting a minimum of 5-8 attempts per hour
- Zip Codes: Run all work in the zip code you're in to be more efficient and get to more stops
- Goals: Set your goals every day on what you are going to achieve that day, for example, how many stops you will hit
 - "Go One More": Push yourself to "go one more" the next one could be a payment or equipment pick up – don't leave extra money on the table

“

Set your goals every day on what you are going to achieve that day
